Context

Last Modified on 2026-11-05

Use *Context* to filter based on the devices' membership of the selected context.
You could use this to make a package available only to a specified context, for example.

General	
Type	*Context*
Context	Select the targeted context
Primary	If selected, the availability of the package depends if the selected context is primary or not. The attribute of primary is determined by the **Priority** field in **Context** > **Overview** screen. The lower the value, the higher the priority.
Matches	*Yes, No*

Agent
It requires the Agent to be running.

Supported platforms

Platform	Supported
Web	Yes
Windows	Yes
macOS	Yes
