

## File size

Last Modified on 04.16.26

Use *File size* to filter based on the size of a certain file. For example, you can choose to install a file only if the already installed version is of a different size.

### General

**Type** *File size*

**File** For example `C:\somefile.txt`

**Compare** *Equal, Not equal, Greater than, Less than*

**Size** The size to check

**Unit** The unit of the size

### Advanced

**Context** The level at which the action is executed, *User* or *Device*

### Agent

It requires the Agent to be running.

## Supported platforms
