

Free disk space

Last Modified on 04.16.26

Use *Free disk space* to filter based on the availability of free space on the specified disk of devices. For example, you can configure an install or copy action to verify that the required disk space is available.

General

Type *Free disk space*

Path The path where the check is performed. Note that this filter works also for a device that is mounted as a directory.

Compare *Equal, Not equal, Greater then, Less then*

Size The size to check

Unit The unit of the size

Advanced

Context The level at which the action is executed, *User* or *Device*

Agent

It requires the Agent to be running.
