

Platform time zone offset

Last Modified on 04.16.26

Use *Platform time zone offset* to filter based on the time zone of users/devices.

General

Type *Platform time zone offset*

Compare *Equal, Not Equal, Greater Than, Lower Than*

Time zone offset The location of the user/device is not taken into account in this case, the filter applies to all the locations (UTC) that fall under the specified time zone.

Advanced

Context The level at which the action is executed, *User* or *Device*. For example, in the case of User context, if the user connects to a remote machine that has a different time zone then the one you set, the filter will not apply.

Agent

It requires the Agent to be running.
