

File size

Last Modified on 04.16.26

Use *File size* to filter based on the size of a certain file. For example, you can choose to install a file only if the already installed version is of a different size.

General

- Type *File size*
- File For example `C:\somefile.txt`
- Compare *Equal, Not equal, Greater then, Less then*
- Size The size to check
- Unit The unit of the size

Advanced

- Context The level at which the action is executed, *User* or *Device*

Agent
It requires the Agent to be running.

Supported platforms

Platform Supported
