

Microsoft Print Server

Last Modified on 04.16.26

The Microsoft Print Server connector allows you to import printers from a print server as packages.

Prerequisites

- The hostname of the Microsoft Print Server.
- A username and password to connect to the Microsoft Print Server.

For more information about the **Overview**, **Entitlements**, **Synchronization Profile**, **Releases** and **Managed packages** screens, see [Overview](#).

Settings screen

Hostname – The hostname on which the Microsoft Print Server is available.

Username – The username which will be used to import the applications.

Password – The password that should be used for the identity. **Network credentials** – The network credentials which will be used to access the print server.
