User Settings

Last Modified on 2026-09-28

Here you can configure global user-lever settings. If a setting is locked, then users cannot override it.

Background section

Color – Set the background color of the **Workspace** tab.
Transparency – Move the slider from left (100% transparency) to right 0% transparency) to adjust the transparency for the background color in the **Workspace** tab only.
Image – Set an image to be used as a background for the **Workspace** and **Contacts** tabs.
Image position – The following options are available:
Fill – Fills the background with the image.
Tile – Creates a pattern of tiles with the selected image.
Center – Places the image in the centre of the background.

> Note that if you select a color and an image at the same time for the background of the **Workspace** tab, the color takes precedence. For example, if you select yellow and set color transparency at 50% the image will have a yellow tint. The image in the **Contacts** tab is never affected by the background color.

Workspace section

Language – The display language for Application Workspace.
Text color – Set the color of text for app icons in the **Workspace** tab.
Text shadow – Enables the text shadow for app icons in the **Workspace** tab.
Animations – If enabled, various animations will be displayed in Application Workspace, e.g. the spinning cogs when you click on an app in the **Workspace** tab.
Limit Icon space – If enabled, the app icons will no longer be spread across the entire area of the Workspace tab, they will be centre-aligned.
Theme – Select a theme for the Application Workspace interface.
Show introduction – Displays the **Welcome to your new Workspace** dialog box at login. If this setting is locked, the dialog box will appear at every login, even if the user deselects the **Show introduction every time you log in** check box.
Double click to launch apps – Override the default one-click behaviour to launch apps.
Show team apps – If enabled, applications associated with teams your users are members of will be displayed in the **Workspace** tab.
Show disabled apps – If enabled, applications that for some reason cannot be launched on the device, will be displayed in the **Workspace** tab. E.g. apps with mandatory Agent, but no Agent installed on the device.
App info icons – If enabled, a small icon is displayed in the top left corner of an app in the Workspace tab, with the last status of the app: *New*, *Favorite*, *Autolaunch*, *Local app* etc.
Tiles – If enabled, the applications' icons are displayed as tiles in the **Workspace** tab.
Tile color – Choose the default color of app tiles. It is applied only if **Tiles** is enabled in this settings section.
App sorting – Choose the order in which applications should be sorted: alphabetically ascending, descending, or no order.
Autolaunch web enabled – Application Workspace will automatically start applications when no Agent is installed.

Group apps in managed folders (Preview) – Enables the managed folders view of applications in the **Workspace** tab for the end users. The end-user can then use the button in the **Workspace** tab to toggle between the tag list or folder view of applications.

Current limitation: the order of apps within a folder cannot be changed.

Catalog section

Show active apps – If enabled, all user entitled apps are displayed in **Catalog**, even the ones they already added to their Application Workspace.
Show disabled apps – If enabled, applications that for some reason cannot be launched on the device, will be displayed in the **Workspace** tab. E.g. apps with mandatory Agent, but no Agent installed on the device.

Search section

Show disabled apps – If enabled, applications that for some reason cannot be launched on the device, will be displayed in the **Workspace** tab. E.g. apps with mandatory Agent, but no Agent installed on the device.

Side menu section

Remember last tab – If enabled, Application Workspace Server will remember users' last opened Side Menu tab in **Workspace** and **Catalog** tabs. If disabled, Application Workspace will default to the tab set in Default tab of this section.
Default tab – Choose which tab(s) should be opened by default in the Side Menu.
Remember last filter – If enabled, Application Workspace Server will remember users' last opened filter on the Side Menu of the **Workspace** tab. If disabled, Application Workspace will default to the tab set in **Default filter** of this section.
Default filter – Choose which filter should be opened by default in the Side Menu.
