# Overview

Last Modified on 2026-09-24

You can download the Microsoft SharePoint webpart for Application Workspace from the Application Workspace Downloads page. After you download `liquit-workspace.sppkg` you can install it into your SharePoint environment.

## Install the Microsoft SharePoint Webpart into SharePoint online

To install the Microsoft SharePoint Webpart, you should navigate to your appcatalog.
For more information on how to set up or find your app catalog see Microsoft documentation.

After installing the Microsoft SharePoint Webpart, you can set up the Webpart by following the steps described in Microsoft SharePoint web part.
