

Novell Vibe Desktop

Last Modified on 2026-05-21

If you want to create an application for Novell Vibe Desktop, you can download it from the Application Workspace Setup Store.

Application Workspace Setup Store Configuration Wizard

We've included a configuration wizard which prompts you for several additional options:

The screenshot shows a configuration wizard dialog box titled "Configure" with a close button (X) in the top right corner. The dialog has three tabs: "Options" (selected), "Add or Remove Programs", and "Release notes". Under the "Options" tab, there are three checkboxes with labels: "Remove all Desktop and/or Start Menu shortcuts" (checked), "Suppress reboots" (checked), and "Run Vibe Desktop after installation" (unchecked). Below these is a section labeled "Vibe Server URL" with a text input field containing "https://". At the bottom right, there are two buttons: "Save" and "Cancel".
