

SecureLogin 8.0

Last Modified on 2026-05-21

You can download NetIQ SecureLogin 8.0 from the MicroFocus Customer Center. For more information, see [NetIQ documentation](#).

When you extract this zip file, you can find the different MSI setups in several subdirectories:

Client Login Extension Configuration Utility Setup (x86)

Is located in the `ClientLoginExtension\nt\final` directory as `ClientLoginExtensionConfigurationUtilitySetup.msi`.

Client Login Extension Configuration Utility Setup (x64)

Is located in the `ClientLoginExtension\nt\finalfor64` directory as `ClientLoginExtensionConfigurationUtilitySetup.msi`.

NMAS Client (x86)

Is located in the `Nmas\NmasClient\x86\Vista` directory as `nmasclient_v32.msi`.

NMAS Client (x64)

Is located in the `Nmas\NmasClient\x64` directory as `nmasclient_v64.msi`.

Manual extraction of NetIQ SecureLogin 8.0.0.268

The `NetIQSecureLogin.exe` contains an uncompressed `NetIQSecureLogin-8.0.0.268.msi` which needs to be extracted manually:

1. Run the `NetIQSecureLogin.exe` setup manually.
2. Opt for a 'Standalone' installation.
3. Wait for the first NetIQ SecureLogin setup dialogue to be shown.
4. Copy the `NetIQSecureLogin-8.0.0.268.msi` and the "Local.cab" and "Product.cab" cab files from the `C:\Users\All Users\Package Cache\{31A09BC9-2878-4DD8-B6E2-9AFF3A0FF332}\v8.0.0.268` directory to a temporary directory. The GUID on your system can be different from the one in this example.
5. Cancel the setup

Setup Commander

All of the above MSI setups are listed in the Setup Store and can be imported there. You can filter the list for 'Novell' and/or 'NetIQ Corporation' or filter the list for the Product Names as listed above.
