Application Workspace Setup Store Configuration Wizard

Zoom Workplace has many extra install options.
We have added the most requested ones in our configuration wizard.

The screenshot shows a configuration wizard window titled "Configure" with a close button (X) in the top right corner. Below the title bar are three tabs: "Options" (selected), "Add or Remove Programs", and "Release notes".

Under the "Options" tab, there are two checked checkboxes:

- Remove all Desktop and/or Start Menu shortcuts
- Suppress reboots

Below these is a link: "For valid Property values, please check this article".

The following properties are listed, each with an empty text input field:

- ZCONFIC
- ZLAUNCHAPP
- ZNODESKTOPSHORTCUT
- ZOOMAUTOSTART
- ZOOMAUTOUPDATE
- ZOOMINSTALLOPTION
- ZRECOMMEND
- ZSILENTSTART
- ZSSOHOST
- MSIRESTARTMANAGERCONTROL

At the bottom of the MSIRESTARTMANAGERCONTROL field, there are two radio buttons:

- Disable
- Enable

At the bottom right of the dialog, there are two buttons: "Save" and "Cancel".
