

Acme Orders

Last Modified on 04.16.26

Get-LiquitAcmeOrder

Synopsis

This command gets the last or currently running ACME order task of a domain.

Syntax

```
Get-LiquitAcmeOrder  
[-Domain] <ZoneDomain[]>  
[-LiquitContext <LiquitContext>]
```

Example

This command returns the ACME order task, if any:

```
Get-LiquitAcmeOrder -Domain $ZoneDomain
```

Request-LiquitAcmeOrder

Synopsis

This command is used to request a new ACME order for a domain.

Syntax

```
Request-LiquitAcmeOrder  
[-Domain] <ZoneDomain[]>  
[-LiquitContext <LiquitContext>]
```

Example

This command returns the new ACME order task:

```
Request-LiquitAcmeOrder -Domain $ZoneDomain
```

Parameters

Name	Value	Description	Required	Default value
Domain	<ZoneDomain[]>	The domain for which you want to return the ACME order task.		
LiquitContext	<LiquitContext>	Determines the selected zone.	No	Default
