Get-LiquitEvent

This command displays a list of all events known within the Application Workspace or you can just select one in particular.

Syntax

```

Get-LiquitEvent
  [-LiquitContext <LiquitContext>]
  [<CommonParameters>]

Get-LiquitEvent
  [-ID] <guid[]>
  [-LiquitContext <LiquitContext>]
  [<CommonParameters>]

Get-LiquitEvent
  [[-TargetType] {Unknown | System | Server | Zone | Tag | IdentitySource | Device | User | Group | DeviceCollection
  | Package | PackageSnapshot | ActionSet | Action | FilterSet | Filter | Workspace | Policy | Context | View | MailServer |
  License | Team | Authenticator | Connector | Credential | ScheduledTask | EntityFilter | Deployment | Content | Identit
  yProvider | Certificate | SystemUpdate | MailTemplate | AuthContract | PersonalPackage | DeviceRegistration | Condi
  onSet | Category | EventCollector | ZoneDomain | UserCollection | Session | Variable | Permission | Resource | Task |
  Approval}]
  [-LiquitContext <LiquitContext>]
  [<CommonParameters>]
  
```

Parameters

Name	Value	Description	Required	Default value
TargetType	{Unknown System Server Zone Tag IdentitySource Device User Group DeviceCollection Package PackageSnapshot ActionSet Action FilterSet Filter Workspace Policy Context View MailServer License Team Authenticator Connector Credential ScheduledTask EntityFilter Deployment Content IdentityProvider Certificate SystemUpdate MailTemplate AuthContract PersonalPackage DeviceRegistration ConditionSet Category EventCollector ZoneDomain UserCollection Session Variable Permission Resource Task Approval}	The place where event took place on (e.g. package, deployment) and for which you want to retrieve events.	Yes	
Date	<DateTime>	A date range for which you want to retrieve events.		
LiquitContext	<LiquitContext>	Determines the selected zone.	No	Default

Examples

The following command retrieves all past events up to 10 days ago:

```

Get-LiquitEvent -TargetType $user -EndDate $(Get-Date).AddDays(-10)
  
```

Recast

The following command retrieves events from the last 30 calendar days:

```
Get-LiquitEvent -TargetType $user -StartDate $(Get-Date).AddDays(-30)
```

The following command retrieves events from the last 8 days excluding today:

```
Get-LiquitEvent -TargetType $user -StartDate $(Get-Date).AddDays(-8) -EndDate $(Get-Date).AddDays(-1)
```
