

## Tag Entity

Last Modified on 04.16.26

### Get-LiquitTagEntity

#### Synopsis

This command displays a list of all the entities bound to a tag.

#### Syntax

```
Get-LiquitTagEntity  
[-Tag] <Tag[]>  
[-LiquitContext <LiquitContext>]  
[<CommonParameters>]
```

#### Example

The following script displays the entities bound to the selected tag:

```
$tag = Get-LiquitTag -id 00000000-0000-0000-0000-000000000000  
Get-LiquitTagEntity -Tag $tag
```

### Add-LiquitTagEntity

#### Synopsis

This command adds an entity to a tag.

#### Syntax

```
Add-LiquitTagEntity  
[-Tag] <Tag>  
[-Entity] <Entity[]>  
[-LiquitContext <LiquitContext>]  
[-WhatIf]  
[-Confirm]  
[<CommonParameters>]
```

#### Example

The following script associated a package with the specified tag:

```
$tag = Get-LiquitTag -ID 00000000-0000-0000-0000-000000000000  
$package = Get-LiquitPackage -ID 00000000-0000-0000-0000-000000000000  
Add-LiquitTagEntity -Tag $tag -Entity $package
```

# Recast

## Parameters

Name	Value	Description	Required	Default value
Tag	<Tag>	The tag to which the the entity should be bound.	Yes	
Entity	<Entity[]>	The entity to be bound.	Yes	
LiquitContext	<LiquitContext>	Determines the selected zone.	No	Default

## Remove-LiquitTagEntity

### Synopsis

This command lets you edit the properties of a tag.

### Syntax

```
Remove-LiquitTagEntity  
[-Tag] <Tag>  
[-Entity] <Entity[]>  
[-LiquitContext <LiquitContext>]  
[-WhatIf]  
[-Confirm]  
[<CommonParameters>]
```

### Example

The following script disassociates the tag from the package:

```
$tag = Get-LiquitTag -ID 00000000-0000-0000-0000-000000000000  
$package = Get-LiquitPackage -ID 00000000-0000-0000-0000-000000000000  
Remove-LiquitTagEntity -Tag $tag -Entity $package
```

## Parameters

Name	Value	Description	Required	Default value
Tag	<Tag>	The tag to be unbound.	Yes	
Entity	<Entity[]>	The entity to be unbound.	Yes	
LiquitContext	<LiquitContext>	Determines the selected zone.	No	Default
