

## Create a ClientId for Setup Commander in IdentityServer3.Core.Models.Client

Last Modified on 04.16.26

1. Open `C:\ProgramData\LANDesk\ServiceDesk\My.IdentityServer\IdentityServer3.Core.Models.Client.json` in a text editor like Notepad.
2. Add the following section:

```
{
  "Enabled": true,
  "ClientId": "SetupCommander",
  "ClientSecrets": [
    {
      "Description": "SetupCommander OpenId",
      "Value": "BrianMayBrightonRock!",
      "Expiration": null,
      "Type": "SharedSecret"
    }
  ],
  "Flow": 4,
  "AllowAccessToAllScopes": true,
  "AllowedScopes": []
}
```

3. In order for your changes to take effect, you must restart the IIS Server.
