

Application Workspace Overview

Last Modified on 2026-06-19

Application Workspace removes the complexity around application delivery, ensuring the stability, reliability, and optimal functioning of applications and other resources across your organization.

Every eligible user can request or gain access to the applications made available to them from our extensive applications catalog.

Application icons are displayed via a customizable web portal/desktop launcher that allows users to [personalize the look and feel of their workspace](#).

Add-on licenses

The following add-ons are available as separate licenses that can further enhance both the user experience as well as automate tasks to make it easier for the system administrator:

Access Manager

Access Manager is a completely integrated single sign-on solution that works smoothly with Application Workspace to provide simple, contextual, immediate access to hundreds of applications.

For information about identity providers and connectors, see [Access Manager](#).

Release and Patch Management

Release & Patch Management ensures that the latest patches and updates run on devices across all applications, versions, platforms, and environments.
