

Application Workspace 4.4.4174

Last Modified on 04.21.26

Release Date: March 17, 2026

Changes

- Fixed an issue where ToggleLauncher could sometimes fail and cause the UI to hang, requiring a restart
 - Fixed NavigationResult handling in Mac WebView logic
 - Updated behaviour when the Agent cannot reach the server so the application now shows the local offline or connection pending page
 - Improved UserHost and Agent behaviour so network disconnected states are handled more consistently when offline mode is unavailable
