

Autodesk Overview

Last Modified on 04.24.26

AutoCAD is probably one of the most time-consuming applications when it comes to preparation and testing for a successful deployment. We recommend you browse the [Autodesk Forums](#) whenever you encounter challenges.

To help you deploy Autodesk applications like AutoCAD, we teamed up with Autodesk and registered for the [Autodesk Developer Network \(ADN\)](#). That gives us access to Autodesk software, NFR licenses, and additional information to give you guidelines on deployment.

Using the ADN and its benefits, we have been able to create KB articles e.g. [AutoCAD](#), [DWG TrueView](#) and [Inventor View](#).
