

Community Edition Tools

Last Modified on 2026-06-09

RCT Community offers tools and actions that help you better manage devices, users, compliance, and content distribution. Below, you'll find a list of all available actions, with links to the associated Help articles.

Limitations:

- RCT Community tools will not work on devices in untrusted domains, workgroup devices, and may limit the number of devices you can run them against.
- RCT Community cannot run those Console Tools that require a Recast Management Server or Recast Proxy.

For information on more Recast Community Tools, see our [OSDeploy](#) & [OSDCloud Docs](#)

DEVICE MANAGEMENT TOOLS	
	<p data-bbox="536 781 679 808">Console Tools</p> <ul data-bbox="571 835 1393 1861" style="list-style-type: none">• System Information – limited Information about the operating system, hardware, disks, applications, Windows updates, services, drivers, user profiles, local group members, and batteries.• Add Devices to Entra Group• AD Security Groups• Connect to C\$• Delete Device(s) from Active Directory• Delete Device(s) from ConfigMgr• Delete Device(s) From Azure (Intune/Entra)• Disable/Enable Device(s) in Active Directory• Entra ID Security Groups• Group Policy Update• Interactive Command Prompt• Interactive PowerShell Prompt• Manage Computer• Open Event Viewer• Open Regedit• Ping System(s)• Register Device(s) in Autopilot• Remove Device(s) from Autopilot• Running Processes• Send Notification• Set Autopilot Group Tag• Sync Intune App and Compliance Policy• Wake on LAN• Cancel Pending Restart or Shutdown• Schedule Restart or Shutdown• Restart System(s)• Shutdown System(s) <p data-bbox="536 1906 655 1933">Client Tools</p>

DEVICE MANAGEMENT TOOLS	
	<ul style="list-style-type: none"> • Remote Software Center – limited Remotely view and install deployed applications and programs, available software updates, and run deployed task sequences • Client Information – limited Details about the components, cache, applications, execution history, and boundaries on the Configuration Manager client • Add Device(s) to Collection • Change Cache Size • Clear Cache • Install Missing Software Updates • Open Client Installation Log File Folder • Open Client Log File Folder • Refresh Updates Compliance State • Repair Client • Rerun Deployment • Restart SMS Agent Host Service • Run Client Check • Show Collections – Advanced • Stop ConfigMgr Client Activities • Uninstall SCCM Client <hr/> <p>Client Actions</p> <ul style="list-style-type: none"> • Application Deployment Evaluation Cycle • Discovery Data Collection Cycle • File Collection Cycle • Hardware Inventory Cycle • Machine Policy Retrieval and Evaluation Cycle • Send Unsent State Messages • Software Inventory Cycle • Software Metering Usage Report Cycle • Software Updates Deployment Evaluation Cycle • Software Updates Scan Cycle • State Message Cache Cleanup • Windows Installer Source List Update Cycle
