

Windows 11 and Windows Server 2022 support

Last Modified on 2026-05-29

Application Workspace affected versions: 3.8 and later

Windows 11 and Windows Server 2022 are not supported for Application Workspace 3.8 and earlier. Full support for these platforms is available starting from 3.9.

Behaviour:

- Windows 11 is detected as Windows 10 within the device inventory.
 - Windows Server 2022 is detected as Windows Server 2019 within the device inventory.
 - Windows 10 platform filter matches devices that are also running Windows 11.
 - Windows Server 2016 platform filter matches devices that are also running Windows Server 2022.
 - Windows 11 and Windows Server 2022 platform filters are not available.
