Resources

Last Modified on 2026-09-28

In the User Portal's Resources section, you can manage your teams and credentials. It's also where you can download the Application Workspace Agent, if it's not already installed.

My Teams

Displays all the teams you are entitled to.

My Credentials

Displays all the stored credentials you have used.

Download Agent

Downloads the Application Workspace Agent corresponding with the Application Workspace Server. This button is not available in Application Workspace Launcher and is hidden from the web interface if you already have the Agent installed.
