

Get-LiquitAppSetting

Last Modified on 2026-08-07

This command retrieves one or more AppSettings from the server.

Syntax

```
# Return all AppSettings
Get-LiquitAppSetting

# Return a single AppSetting by ID
Get-LiquitAppSetting [-ID] <Guid>

# Return AppSettings matching a full-text search
Get-LiquitAppSetting [-Search] <string>

# Return AppSettings whose name matches a wildcard pattern
Get-LiquitAppSetting [-Name] <string>
```

Parameters

Parameter	Type	Position	Mandatory	Pipeline	Description
ID	Guid	0	No	Yes (ByValue)	Returns the single AppSetting with this ID.
Search	string	0	No	No	Full-text search across AppSetting fields.
Name	string	0	No	No	Filters by name. Supports * and ? wildcards.

ID, Search, and Name are mutually exclusive parameter sets. Calling without any parameter returns all AppSettings.

Output: AppSetting[]

Examples

```
# Get all
Get-LiquitAppSetting

# By ID
Get-LiquitAppSetting -ID 'a1b2c3d4-...'
```

```
# Wildcard name filter
Get-LiquitAppSetting -Name 'Outlook*'
```

```
# Full-text search
Get-LiquitAppSetting -Search 'Office'
```
