

Set-LiquitAppSettingExcludedItem

Last Modified on 2026-08-07

Modifies one or all Excluded Items under an Included Item. Only specified properties are changed.

Syntax

```
Set-LiquitAppSettingExcludedItem
[-Parent] <AppSettingIncludedItem>
[-ExcludedItemIndex <int>]
[-Name <string>]
[-Value <string>]
[-WhatIf] [-Confirm]
```

Parameters

Parameter	Type	Position	Mandatory	Description
Parent	AppSettingIncludedItem	0	Yes	The parent Included Item. Accepts pipeline input.
ExcludedItemIndex	int	—	No	Zero-based index of the specific Excluded Item to patch. If omitted, all Excluded Items are updated. Must be ≥ 0 .
Name	string	—	No	New display name.
Value	string	—	No	New exclusion path or name. Leading \ is stripped automatically.

If `ExcludedItemIndex` is out of range, a non-terminating error is written and no changes are made.

If no modifiable parameter is provided, the cmdlet does nothing and returns no output.

Output: AppSettingExcludedItem

Supports: -WhatIf , -Confirm

Examples

```
$setting = Get-LiquitAppSetting -Name 'Outlook Settings'
$includedItem = $setting.IncludedItems[0]

# Rename the first excluded item
Set-LiquitAppSettingExcludedItem `
  -Parent $includedItem `
  -ExcludedItemIndex 0 `
  -Name 'Exclude Cache'

# Change the exclusion path for all excluded items
Set-LiquitAppSettingExcludedItem -Parent $includedItem -Value 'Cache'
```
