

ConfigMgr SQL Server Settings

Last Modified on 2026-08-12

These settings are visible when **ConfigMgr SQL Server** is enabled as a data source for application migration.

- **ConfigMgr SQL Server:** Hostname or IP of the SQL Server hosting the ConfigMgr database
- **ConfigMgr Database:** Name of the ConfigMgr site database (ex. CM_XXX)
- **ConfigMgr App Prefix:** Optional prefix added to app names on import (ex. CM -)
- **Trust SQL Server Certificate:** Enable if your SQL Server uses a self-signed or internal CA certificate

Click **Test ConfigMgr Connection** to verify.
