

Lansweeper Settings

Last Modified on 2026-08-17

These settings are visible when **Lansweeper** is enabled as a data source for application migration.

- **Lansweeper Personal Token:** Personal access token for the Lansweeper Data API

You can generate a Personal Access Token in the Lansweeper Web App under **Account Settings > Personal Access Tokens**.

- **Lansweeper App Prefix:** Optional prefix added to app names in matching output

Click **Test Lansweeper Connection** to verify.
