

Jamf Inventory, Match & Deploy Import

Last Modified on 2026-08-18

Jamf Inventory tab

Displays application inventory from Jamf Pro (Mac App Store apps, in-house apps, and packages).

Columns visible by default: Name, Version, Device Count, Source, Size

Hidden columns: Bundle ID

Jamf Matches tab

Displays fuzzy-match results between Jamf inventory and Zone resources.

Hidden columns: Reason, Bundle ID, Zone Resource Created, Zone Resource ID

Jamf Deploy Import tab

Displays Jamf packages available for import into Zone. Supports editing the name, version, and the App Name used for launch actions (for example, Acrobat Reader.app). Icons can be uploaded per row.
