

RMS Inventory & Matches

Last Modified on 2026-08-18

RMS Inventory tab

Displays applications retrieved from the Recast Management Server AM.Applications table via SQL query.

Columns visible by default: Name, Publisher, Architecture, Language, Latest Version Check

Hidden columns: Created

RMS Matches tab

Displays fuzzy-match results between Recast Management Server applications and Zone resources. No package import is available – this source is inventory and matching only.

Columns visible by default: ✓ (select), Exists, RMS Name, Publisher, Best Zone Name, Best Zone Version, Score

Hidden columns: Architecture, Reason, Zone Resource Created, Zone Resource ID
