

Application Workspace 4.4.4341

Last Modified on 2026-08-19

Release Date: August 19, 2026

Application Workspace Version 4.4.4341.2348 includes bug fixes and security enhancements.

Bug Fixes & Security Enhancements

- Application Workspace user interface now launches correctly. (Customer-Reported Bug 88152)
 - When attempting to repair a custom package, the Repair action now starts as expected from the launcher. (Customer-Reported Bug 87340)
 - System tray/notification area icon is no longer blurry. (Customer-Reported Bug 82303)
 - Application Workspace now closes down properly.
 - Get-LiquitPackage – The Type filter now limits results to the specified package type.
 - Acceptance stage name is no longer hardcoded in French.
 - No more usage of `npm install` instead of `npm ci` in CI (and other places)
 - and we've tightened security measures when an admin or a user changes an Application Workspace password.
