

Nexthink Inventory & Matches

Last Modified on 2026-09-25

Nexthink Inventory tab

Displays installed packages discovered via NQL (Nexthink Query Language) across managed endpoints.

Nexthink Matches tab

Displays fuzzy-match results between Nexthink installed packages and Zone resources.

Select rows and click **Process Selected** to create Zone packages for matched applications — Nexthink is a read-only inventory source, so no installer files are downloaded from Nexthink.

Columns visible by default: ✓ (select), Exists, Nexthink Name, Publisher, Version, Best Zone Match, Zone Version, Score, Reason, Status
