Login

Last Modified on 2026-11-12

This element controls the login behaviour for the Application Workspace Agent.

```
{
   "login": {
      "enabled": true,
      "sso": true,
      "identitySource": "LIQUIT",
      "timeout": 4
      "showConnectionPendingScreen": false
   }
}
```

Key	Description	Default
enabled	If set to 'true', the user will be prompted for login.	true
sso	If set to 'true', the Universal Agent will use the value of the identity source key you provide, to facilitate Single Sign-On.	false
identitySource	The default identity source used to log in the user. Use the name of the identity source as you defined it within Application Workspace.	
timeout	The interval in seconds after which the Application Workspace login prompt will be displayed if Single Sign-On could not be performed within the interval.	4
showConnectionPendingScreen	If the agent is unable to reach the targeted zone during the Single Sign-On login, the connection pending window is shown.	false
