# Triggers

Last Modified on 2026-11-04

Options for modifying the behaviour of events configured for package entitlements.

```
{
   "triggers": {
      "enabled": true,
      "primary": true
   }
}
```

| Key | Description | Default |
|---|---|---|
| enabled | Allow Application Workspace to execute events like refresh or login for example. | true |
| primary | If set to *true*, the Agent triggers events only for the primary zone defined as the zone key in the Agent.json file. | false |
