Recast

Intune Group Shows Member Count of 0

Last Modified on 2026-11-11

Problem

On the RCT Patching **Deployment Process Details** page, hovering over the Info icon for an Intune group reveals a**Member count** of **0** (zero).

Potential Cause

This issue can occur if you haven't added, or granted consent to, all the necessary Microsoft Graph API permissions in the app registration tied to the Recast Management Server service connection.

Troubleshooting Steps

Check that all required **Application permissions** have been added to the app registration and consent has been granted. See Add API Permissions for Right Click Tools Patching.
